Figures taken from the Office of Rail Regulation

Between 05/06 and 06/07 the methodology in counting was changed and explains in part some of the increases particularly at the Greater London stations and Portsmouth Harbour. Nevertheless the trend is clearly one which is rising in terms of entries and exits at stations where South West Trains are making proposing to make cuts.

The changes to the methodology are;

- 1) data representing journeys made on national rail using London Travelcards sold at a TfL outlet or at a ToC office in Zone 1 are included in the 06/07 numbers
- 2) Tickets sold for national rail journeys at London stations that have only an LUL not a ToC booking office are included in the 06/07 numbers.
- 3) Counting journeys made to "group stations" has been updated. This explains in large part the huge increase at Portsmouth Harbour.
